Introduction

In Bg2 almost all the quest items have unique images, while in Bg1 they look like common miscellaneous items. For example *Invitation to Ducal Palace* look like ordinary letter. This mod brings unique icons for 22 quest items and plot items in BG1: both for inventory and description window. All the images were made by artist specially for this mod.

Credits and Copyright Information

The modding community for the Infinity Engine has been going strong for more than 10 years now, and is the culmination of thousands of unpaid modding hours by fellow fans of the game. Modders produce their best work and players get the best, well-supported mods when we all work together.

There are two big ways to upset this harmony. One is to claim someone else's work as your own. The second is to host and redistribute a mod without permission from the author(s).

Be kind to your fellow players and modders. Don't do either.
